

In the Abstract;

Please delete the paragraph at page 23. lines 2 to 4.

Please amend the paragraph at page 23, lines 5 to 14, as follows:

A fuse holder, ~~which comprises~~ holder includes: a holder housing, in which a chamber for holding blade terminals and at least a part of the body of a fuse is formed with wide walls at the front and the rear and narrow walls on the right and the left; ~~left;~~ two coupling parts, which are provided on the holder housing to disconnectably fit the holder housing onto holder housings of two other adjacent fuse ~~holders,~~ holders; and two contacts, each of which has an intermediate part fixed to the holder housing, a connecting part, at one end, extending into the chamber to fit with a blade terminal of the fuse, and a leg, at the other end, extending out of the holder housing to be soldered or press-fitted onto a printed circuit board.
